

THE GREEN SCENE

SUMMER 2026

Executive Officer's Message: LAURA ZUNIGA

Sustainability in the Built Environment: A Collective Path Forward

As California continues to lead the nation in environmental stewardship, the role of landscape architecture in shaping a sustainable built environment has never been more essential. Landscape architecture sits at the intersection of natural systems, community needs, and long-term resilience. The choices landscape architects make whether in planning, design, or material selection—have lasting impacts on ecological health and quality of life.

Sustainability today is no longer a niche aspiration; it is a foundational expectation. Communities are looking to the built environment to do more than simply function. They expect it to conserve resources, support biodiversity, and adapt to a changing climate. Landscape architects are uniquely positioned to meet this moment, and their work naturally integrates living systems with human activity, offering solutions that are both practical and regenerative.

Across the state, we see growing momentum around nature-based strategies: designing with water rather than against it, prioritizing climate-appropriate planting, and creating outdoor spaces that supporting both environmental performance and human well-being.

As the regulatory landscape evolves and new technologies emerge, the California Landscape Architects Technical Committee (LATC) remains committed to supporting practitioners in navigating this dynamic terrain. Sustainable approaches to landscape architecture help protect consumers from avoidable environmental, safety, and maintenance risks, reinforcing the LATC's commitment to safeguarding the health and welfare of California communities.

Sincerely,

Laura Zuniga

LATC Executive Officer

Chair's Message: PAMELA BRIEF

As we navigate an era of significant environmental change, our role as landscape architects is vital. From building climate resilience to designing equitable, sustainable spaces, your work directly safeguards the health, safety, and welfare of California's communities. As chair of the

LATC, I am honored to share how we are evolving to support you and the future of our profession.

A core priority for the LATC is making sure our licensure pathways reflect the diverse needs of today's aspiring professionals. We are actively working to break down unnecessary barriers to entry while maintaining the rigorous standards that protect the public. By supporting flexible education and experience requirements, we are opening doors for a new, passionate generation of landscape architects to enter the field and bring innovative solutions to our built environment.

Last year and this year, I attended most of the Board of Forestry Zone Zero Committee meetings. We are pleased to see many of our recommendations

incorporated in the latest draft rule plead. The LATC supports the latest Zone Zero draft rule. We suggested language be included to say new trees should not be planted in Zone Zero. We believe the addition is important to the protection of Californians.

We are currently executing our 2025–2028 Strategic Plan with a clear focus on modernizing our operations and strengthening our community connection. A major pillar of this plan is increasing communication and engagement. This newsletter is a perfect example of our commitment to communication.

Your insights, field experience, and feedback are what ground our regulatory work in reality. I invite you to join our upcoming public committee meetings, review our progress, and actively share your voice as we implement these strategic goals. You can find our meeting schedule on LATC's upcoming [meetings page](#) on our website under About Us.

Thank you for your continued dedication to excellence and for your partnership in keeping California beautiful, resilient, and safe.

Sincerely,

Pamela Brief

LATC Chair

LATC Committee Members

Pamela Brief, Chair

Martin "Marty" Armstrong, Vice Chair

Patricia Trauth

Jon Wreschinsky

Susan Landry

LATC's five-member committee consists of technical experts who are licensed to practice landscape architecture in California. Under the provisions of AB 1546, the governor appoints three of the members, one is appointed by the Senate Committee of Rules, and one is appointed by the speaker of the assembly.

Landscape Architecture Registration Examination 2026 Testing Information

The 2026 Landscape Architecture Registration Examination (LARE) cycle offers three administrative windows (spring, summer, and winter), giving candidates multiple opportunities to complete the four sections of the exam on their path to licensure. The Council of Landscape Architecture Registration Boards (CLARB) has released the national testing windows, and the LATC has published the corresponding California eligibility and registration deadlines.

California candidates must have their eligibility approved by the LATC before they can register with CLARB. Candidates must submit their eligibility application and all required documents no later than 45 days before the first day of the exam window they plan to take. This includes submitting transcripts, experience verification, and any required credential evaluations for foreign-educated candidates. Once authorized, candidates register and schedule their exams directly through CLARB's online system. Early scheduling increases the likelihood of securing preferred testing dates.

The LATC has published the following [2026 deadlines](#):

Spring 2026

Eligibility Deadline with LATC: February 6, 2026

Registration Deadline with CLARB: March 25, 2026

Testing Window with CLARB: March 30 to April 15, 2026

Summer 2026

Eligibility Deadline: June 5, 2026

Registration Deadline: July 22, 2026

Testing Window: July 27 to August 12, 2026

Winter 2026

Eligibility Deadline: October 9, 2026

Registration Deadline: November 24, 2026

Testing Window: November 30 to December 16, 2026

The 2026 LARE schedule provides flexibility, but success depends on early planning and meeting LATC's eligibility deadlines. CLARB encourages candidates to plan ahead and register early to secure preferred testing locations and dates. Candidates who organize their documents now and map out their exam strategy will be well positioned to complete the LARE in the coming year.

Mark Your Calendars: Upcoming LATC Meetings for 2026

The LATC is pleased to announce its next scheduled committee meetings for 2026. The LATC meetings serve as key opportunities for members of the public and stakeholders in the landscape architecture community to stay informed, engage in discussion, and contribute to the future of the profession in California.

Meeting materials may be found online at www.latc.ca.gov/about_us/meetings/.

Whether you are a licensed landscape architect, a member of the public, a student, an educator, or simply interested in the profession, attending a LATC meeting is a great way to stay connected to the regulatory landscape and contribute your voice.

Department of Consumer Affairs: License Search

Did you know the Department of Consumer Affairs offers an online license lookup tool, making it easy to verify professional licenses, including those held by landscape architects? This resource helps consumers, agencies, and industry professionals confirm a license is valid and in good standing before moving forward with a project or service.

The search tool provides real-time information on licenses issued by the Department. Each record shows whether a license is active, expired, or inactive, and it also notes all disciplinary actions such as suspensions, revocations, or citations.

The tool can be especially helpful when reviewing consultant teams, responding to public inquiries, or conducting due diligence on new partnerships. To use the search tool, visit <https://search.dca.ca.gov/>.

LATC Offers Outreach

Are you interested in outreach or LATC hosting a presentation? The LATC is committed to engaging with the community and supporting consumers, protecting public health, safety, and welfare through outreach and education. If you are planning an educational seminar or student-focused gathering, LATC would be pleased to participate and share valuable information about licensure and professional standards.

The LATC offers outreach school presentation services on the following topics:

Landscape Architect Technical Committee:

- An overview and history of LATC
- Roles and responsibilities of LATC

Consumer Protection:

- Complaint process
- How to respond if contacted by the LATC
- How to file a complaint

- License verification
- Overview of laws and regulations

Application and Licensure Process:

- Overview of applications
- How to renew a license

Online Services Offered:

- LATC website
- LATC Connect Platform (Application and renewal system)
- ListServ (Interested parties email list)
- Social media (Instagram, LinkedIn, BlueSky)

To learn more about LATC's outreach efforts or to schedule a presentation, contact LATC at LATC@dca.ca.gov. Whether it is in-person or virtual, LATC welcomes the opportunity to connect with aspiring and practicing landscape architects across California.

Celebrating LATC Members Elected to the American Society of Landscape Architects Council of Fellows

The LATC is proud to recognize two of its distinguished members, Jon Wreschinsky, FASLA, and Patricia Trauth, FASLA, on their election to the American Society of Landscape Architects (ASLA) Council of Fellows, one of the highest honors in the profession.

ASLA fellowship is awarded to landscape architects who have made exceptional contributions to the field and have maintained at least a decade of full ASLA membership. Since the first class in 1899, fewer than 1,600 landscape architects have received this honor, making fellowship a rare and meaningful milestone.

Jon Wreschinsky and Patricia Trauth's elevation reflect their long-standing commitment to advancing landscape architecture through leadership, innovation, and service. Their work has strengthened communities, strengthened professional practice, and inspired the next generation of landscape architects. Their recognition also highlights their depth of expertise and dedication within the landscape architecture community.

Please join us in congratulating Jon Wreschinsky, and Patricia Trauth on this well-deserved achievement. Their contributions continue to elevate the profession and exemplify the values at heart of landscape architecture.

Get Paid to Volunteer! Help Shape the Landscape Architect California Supplemental Exam

The LATC is seeking dedicated and qualified licensed landscape architects to serve as subject matter experts (SMEs) for the development of the California Supplemental Exam (CSE). SMEs selected to participate will receive a \$200 honorarium and reimbursement for all board-approved travel expenses.

To make sure the CSE accurately reflects current professional practice, SMEs will participate in two-day examination development workshops held virtually or in Sacramento. These workshops are critical to maintaining the integrity and relevance of the licensing process. Participants will engage in activities such as writing and refining test questions, reviewing content for clarity and accuracy, and contributing to the standard-setting process that determines passing scores.

Qualified SMEs must meet the following criteria:

- Hold a current and active California landscape architect license (not retired).
- Be actively working in the profession with up-to-date knowledge and experience.
- Not currently serving as a member of a board, bureau, or committee to avoid potential conflicts of interest.

LATC aims to assemble a group reflecting the diversity of the profession. It will consider geographic region, practice specialty, ethnicity, and gender for a well-rounded and inclusive examination development process.

If you are a licensed professional passionate about contributing to the future of the landscape architecture profession in California, LATC encourages you to get involved.

For more information on how to apply or participate, please contact the LATC at LATC@dca.ca.gov.

Frequently Asked Questions

Each newsletter will feature answers to some of the most common questions received from candidates. This section is designed to provide helpful guidance, clarify application and examination procedures, and provide support throughout the application and licensure process

Q. What does the Landscape Architect Technical Committee (LATC) do?

A. Under the purview of the California Architects Board, LATC oversees the licensure, regulation, and enforcement of landscape architects in California. LATC supports consumer protection; the health, safety, and welfare of all; and ensures that licensees meet professional standards.

Q. Does LATC handle enforcement?

A. Yes. LATC investigates complaints and can take disciplinary action, including citations, fines, suspensions, or revocations when necessary to protect the public. To file a complaint against a business or individual, complete LATC's [complaint form](#) on our website under Consumers | Filing A Complaint.

Q. What are the requirements to become a licensed landscape architect in California?

A. Applicants must meet education and/or experience requirements, pass the national Landscape Architect Registration Examination (LARE) and complete the California Supplement Examination (CSE) as outlined in CCR 2620: Education and Training Credits. For more information on CCR 2620 and the initial licensure requirements, visit LATC's [becoming a landscape architect page](#) on our website under Candidates | Basic Information.

Q. How do I renew my license?

A. Your renewal application will be mailed to the address of record 90 days prior to the expiration date. You may complete and return the renewal application to LATC along with the appropriate payment. A license may also be [renewed online](#) at <https://latc.ca.gov>.

Landscape Architecture

A STEM Profession Shaping the Future

Landscape architecture is a Science, Technology, Engineering, Mathematical (STEM) profession. Landscape architecture is often celebrated for its artistry: the parks, plazas, trails, and public spaces that enrich daily lives. Behind every beautiful landscape is the foundation of rigorous science, advanced technology, engineering precision, and mathematical analysis.

Science:

Landscape architects draw on ecology, soil science, hydrology, botany, and climate science to design environments that function as well as they look. Whether restoring wetlands, managing stormwater, or selecting climate-appropriate plant communities, the work requires a thorough understanding of natural systems and how they respond to human activity and environmental change.

Technology:

The modern practice of landscape architecture is powered by sophisticated digital tools. Geographic Information Systems (GIS) are used to analyze, visualize, and design landscapes using spatial data. 3D modeling is used to simulate site conditions, and advanced visualization software to communicate design with intent.

Engineering:

Every landscape built must work safely, sustainably, and efficiently. Landscape architects design grading plans, stormwater management systems, retaining structures, circulation networks, and accessibility solutions that meet engineering standards. Landscape architects collaborate closely with civil, structural, and environmental engineers, often leading interdisciplinary teams to make sure site systems are integrated and resilient.

Mathematical:

From calculating runoff volumes and solar angles to modeling pedestrian flow and determining material quantities, mathematics is embedded into the daily practice of landscape architecture. The precision required to translate a conceptual design into a constructible plan is fundamentally mathematical.

Acknowledging landscape architecture as a STEM discipline has real implications such as:

- Strengthening the pipeline of future professionals by opening doors to STEM education funding and scholarships.
- Helping policymakers understand the technical expertise landscape architects bring to climate adaptation, wildfire resilience, water management, and sustainable development.
- Reinforcing the profession's essential role in solving some of the most complex environmental and urban challenges of our time.

Landscape architecture sits at the intersection of creativity and technical mastery. Recognizing landscape architecture as a STEM profession honors the discipline and highlights the critical contributions landscape architects make to building more resilient communities.

LATC Invites Educational Institutions to Host Committee Meetings

LATC is committed to strengthening its connection with California's academic community and supporting the next generation of landscape architects. As part of this commitment, LATC welcomes opportunities to hold official committee meetings at colleges and universities across the state.

Hosting an LATC meeting on campus offers students, faculty, and administrators a unique opportunity to observe the process firsthand and engage directly with the body responsible for consumer protection, licensure standards, and professional oversight in landscape architecture in California.

LATC meetings held on campus provide valuable exposure to the governance and public protection work that shapes the profession. During these meetings, attendees can expect insight into LATC's mission and operations, including how the Committee supports public health, safety, and welfare. Attendees can also expect real time observation of regulatory discussions such as examination updates, enforcement matters, and educational standards. These meetings also provide visibility into public decision making, demonstrating how transparency and accountability guide LATC's work.

Hosting an LATC meeting can enrich academic programs by introducing students to licensure requirements and professional expectations, encouraging early engagement with the profession's oversight structure, and strengthening relationships between LATC and California's landscape architecture programs.

LATC welcomes inquiries from accredited and pre-professional landscape architecture programs, as well as related departments interested in exposing students to the process. To learn more or express interest in hosting a future LATC meeting, email

LATC@dca.ca.gov.

Enforcement Actions

Citations

Cristin Franklin

Lafayette – The Board issued a one-count citation against Respondent for violating Business and Professions Code section 5640 (Unlicensed Person Engaging in the Practice of Landscape Architecture). Respondent provided landscape architecture services for a project for four years before hiring a licensed landscape architect for her firm. The Board found this to be a Class A violation, fined Respondent \$1,000, and issued an order of abatement requiring Respondent to cease and desist from engaging in unlicensed practice. Respondent paid the fine, satisfying the citation. The citation became final on March 19, 2026.

Corey Brooks (LA 6115)

Lafayette – The Board issued a one-count citation against Respondent (Landscape Architect License No. 6115), for violating Business and Professions Code section 5642 (Partnership, Corporation-Unlicensed Person) and California Code of Regulations, Title 16, section 2671 (Public Presentments and Advertising Requirements). Respondent stamped construction documents for a project without his name, license number, or stamp appearing on the contract related to the construction documents. The Board found this to be a Class C violation, imposed a \$1,000 fine, and issued an order of abatement for Respondent to cease and desist from violating Business and Professions Code section 5642 and California Code of Regulations, Title 16, section 2671. Respondent paid the fine, satisfying the citation. The citation became final on March 19, 2026.

Navigating the New Online Licensure System—Connect

Your Step-by-Step Guide to Getting Started

Welcome to the “Navigating Connect” series, created to guide future landscape architects through LATC’s new online application portal, Connect. Whether you are just starting the journey or seeking licensure by reciprocity, this series will help make the process smooth and clear.

LATC transitioned to the Connect platform in May 2023, giving candidates and licensees a streamlined way to:

- Apply for eligibility for the Landscape Architect Registration Examination (LARE).
- Apply for the California Supplemental Examination (CSE).
- Apply and renew California landscape architect license and reciprocity.

Once the LATC approves a candidate’s application, the next phase of the licensure process begins. Candidates must complete specific steps to move forward with testing for the LARE and the CSE. The following guidance outlines what candidates should expect and how to prepare for the examinations.

LARE

Once LATC approves a candidate’s eligibility, the Committee authorizes the candidate to test through the Council of Landscape Architects Registration Boards (CLARB) system. Candidates will receive confirmation when authorization has been transmitted and may then register for any available LARE administration window.

Candidates register for each LARE section directly through CLARB. Registration deadlines apply for every administration window, and candidates are responsible for registering before the published cutoff dates. Early registration is recommended to secure preferred testing dates and locations.

CLARB provides detailed information regarding the LARE format, content areas, and reference materials. Candidates should review the current LARE Orientation Guide and section specifications to understand the competencies evaluated in each of the four sections.

CSE

After passing all four sections of the LARE, candidates submit the CSE Application to LATC. After approval from the LATC, candidates become eligible to take the CSE. LATC will notify the candidate via an email on the Connect portal once eligibility has been transmitted to the examination vendor. Candidates may then schedule their examination appointment directly through the vendor’s online system. Examination appointments are available year-round, subject to site availability. Visit LATC’s [PSI Exams](#) page for more information.

Candidates should review the current CSE Test Plan, which outlines the knowledge areas evaluated on the examination. The [test plan, reference materials, and examination procedures](#) are available on LATC’s website under Candidates | CSE. Candidates are responsible for being familiar with California laws, regulations, and practice standards relevant to the profession.

Results for the CSE are provided after the examination in accordance with the vendor’s reporting procedures. Candidates who pass the CSE will receive instructions for completing the final steps toward licensure. Candidates who do not pass must wait the required retake period of 90 days and pay the necessary fees before scheduling a new CSE appointment.

Newly Licensed Landscape Architects Licensees

LATC proudly congratulates our newly-licensed landscape architects on reaching this significant professional milestone.

You should have received a welcome packet containing your wall certificate, instructions for your stamp, and the *Consumer's Guide to Hiring a Landscape Architect*.

To stay informed about LATC updates and issues affecting your license, please visit www.latc.ca.gov/. Be sure to sign up for LATC's social media and other notifications to keep up with the latest news and developments.

Congratulations on your achievement!
